

About us

Dubiel Vitrum is an advanced manufacturing facility focusing on:

- glass processing
- mirror manufacturing
- manufacturing of glass interior furnishing elements
- safety glass processing for the purposes of architecture and construction – safety glass manufacturing

Our company is located in Rabka Zdrój, along the national road Kraków - Zakopane. With an area of 4,200 square meters, the facility is equipped with more than a dozen advanced glass processing machines: cutting tables, grinders, chamfering machines, drills, processing stations, a furnace for manufacturing flat and bent tempered glass panes, an advanced PVB laminating line, printing machines enabling us to print on glass and foil. Currently, we employ approx. 200 people.

Dubiel Vitrum cooperates with construction stores, bathroom furnishing outlets, furniture makers and interior furnishing suppliers, fitters of architectural glass and glass structures, metalwork and handicraft businesses, steel structure manufacturers, and other glass processing facilities. We also serve small producers of interior furnishings and service companies that provide glass and mirror measurement, design and assembly services.

We use an innovative approach to the issues of glass processing. We are eager to take up difficult projects, perform tests, and examine how glass behaves in relation to the intended purpose.

Dubiel Vitrum has been repeatedly awarded the title of Market Leader and recognized as the best glass production company in Poland.
